Initial Loading screen with gradient animation.
This should represent the different minds
entering the space/ app / service.

An example of how the game/testing
portion may look like

Here is an example of the home screen. The idea
is that the user is able to see the roadmap ahead
of them. The bottom of the screen shows you what
page you are on (i.e. roadmap, profile, etc). The top
would list language in use and maybe badges or
accomplishments at the top?
